MAQUINÀRIA PREPACKING

Description

The touch screen weighing machine PSET is equipped with brand new electronic weighing units and distribution panel.

- Faster and more precise weighing.
- Interactive security, all alarms are shown on screen.
- Count and weigh: different weighing and counting for each side.
- Total control and adjustability of the all elements of the weigher.
- Any element can be cancelled if not working correctly (for example a damaged belt can be cancelled by selecting it in the touch screen. This way the machine can continue working until the belt, cylinders or weighing cell have been changed).
- The weight tolerance can be adjusted manually or automatically, applying 1% of the desired weight automatically and being able to change that value.
- The weight of each fruit is shown on screen and the weight achieved in each belt.

Characteristics

TOUCH SCREEN WEIGHING MACHINE PSET

- Control
- Supply voltage
- Frequency
- Air consumption
- Pressure
- Discharge height
- Loading height
- Weight
- Working temperature
- External dimensions
